SUBCELLULAR LOCATION: Type I membrane protein.
TISSUE SPECIFICITY: EXPRESSED IN ADULT LUNG AN
FETAL LIVER, BRAIN, INTESTINE AND PLACENTA.
SIMILARITY: Belongs to the Tyr family of prote
CSF-1/PDGF receptor subtamily.

SUBCELLULAR LOCATION: Type I membrane protein.
SIMILARITY: Belongs to the Tyr family of protein kinases.
CSF-1/PDGF receptor subfamily.
SIMILARITY: Contains 7 immunoglobulin-like C2-type domains.

SUBUNIT: Seems to associate with xanthine dehydrogenase/oxidase.

SUBCELLULAR LOCATION: Type I membrane protein.

TISSUE SPECIFICITY: Expressed in mammary tissue and secreted in association with the milk fat-globule membrane during lactation.

DEVELOPMENTAL STAGE: Expression increases during the last half of pregnancy and is maximal during lactation.

SIMILARITY: Belongs to the immunociation.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Local
